Entity examples

Column

```java
@Column(name = "name", nullable = false, unique = true)
private String name;
```

ManyToOne

```java
@ManyToOne(fetch = FetchType.LAZY, targetEntity = Authority.class, optional =
false)
@JoinColumn(name = "authority_id", nullable = false)
private Authority authority;
```

OneToMany

```java
@OneToMany(cascade = {CascadeType.PERSIST, CascadeType.MERGE}, fetch =
FetchType.LAZY,
    targetEntity = Account.class, mappedBy = "authority")
@Where(clause = "deleted = 'false'")
@OrderBy("id asc")
private List<Account> accounts;
```

OneToOne

```java
@OneToOne(cascade = {CascadeType.PERSIST, CascadeType.MERGE}, fetch =
FetchType.LAZY,
    targetEntity = User.class, mappedBy = "account", optional = false)
private User user;
```
